Note Chapter 18 explains the options you see when you open a new file in Photoshop. In the following list, you'll find a brief description of each option and whether it works in the Graphics editor or not. * **Image**. This option, also called the `_basic_` or `_blank_` option, creates a document with a background, a layer, and a few other items such as a lock. It's the starting point for all graphic images. The traditional way to create an image in Photoshop is to duplicate a layer, duplicate that layer, move it around, and change its opacity to simulate different kinds of images. * **New**. This option creates a new file with a layer and a background. * **Open**. This option opens an existing file with a background and layer. You may see this option if you're dragging a file from a Finder window to the Photoshop window.

A new poll shows Andrew Wiggins rising as a potential star in the NBA draft. He's already probably the best prospect for the 10th pick in the 2014 draft. (USA Today) Apparently no one told Wizards GM Ernie Grunfeld about a 16-year-old phenom from Kansas City. It's a good job he doesn't have Twitter, because that's the only way he'd find out about a 17-year-old kid whose stock is rising so quickly his name is mentioned in the same breath as LeBron James, Carmelo Anthony and Chris Paul. The only problem is no one told Grunfeld about Rui Hachimura, the 17-year-old 7-footer from Japan who is barely 5-foot-9 but has talent we've never seen before in a basketball player. He's the unknown foreign prospect to watch on Draft Night. Here's a video from an international tournament in which Hachimura takes on four players bigger than him. It's insane. He's got range and hops for his size. He's the rare 7-footer who is really tough and aggressive on the offensive end. He's not just the best 7-footer in college basketball. He's the best player in college basketball. (Seriously, here he goes up against some good players, and he has a bad-ass demeanor.) Hachimura is the closest thing to a 7-foot Rasheed Wallace that we've ever seen. He's always been a tremendous passer out of the post, but he's way above average as a shooter. He's the best center in college basketball. He has the best combination of size, quickness and shooting range of anyone. He can score over smaller centers, and he has the ability to knock down 3s with ease. Hachimura has elite physical tools. If he had a third gear, he'd be unstoppable. He has a ton of potential./* * Copyright 2000-2012 JetBrains s.r.o. * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in compliance with the License. * You may obtain a copy of the License at * * * * Unless required by applicable law or agreed to in writing, software * distributed under the License is distributed on

Should I do a Product Review, or a Product Audit? The decision to have a review is based on what you want to know. Most product reviews are done as part of the development process for a new product. If you plan on releasing this new product to market, you would need to use the review to validate that it does what it says it does, and you would have a review that can be used as the basis for your next product release.
