AutoCAD came along, architects and engineers had to use rulers and protractors to create 2D drawings. In AutoCAD, you don't need to attach objects to the drawing canvas and use rulers to add text and dimensions. Instead, you can draw on the actual drawing canvas, using the cursor as a guide. To draw with the mouse, place the cursor over the desired area on the drawing canvas and then click. To draw with the pen, place the pen tip over the desired area and then click. You can draw both horizontal and vertical lines in AutoCAD. To draw a vertical line, click on the drawing canvas. Then, press the Ctrl+Shift keys to create a vertical line. To create a horizontal line, click on the drawing canvas and then press the Shift+Ctrl keys. To draw circles, you can use the following simple drawing method. Place the cursor over the desired circle and click. After that, drag the cursor over the desired circle until the circle is perfectly drawn. The aim of the present study was to evaluate the fracture strength and failure mode of glass ionomer cements when used with full coverage restorative materials. Nine new glass-ionomer cements were tested. The cements were divided into three groups, each consisting of three subgroups (n = 10): no full coverage restorative material, acid-etching of the restoration surface, and acid-etching plus addition of a full coverage restorative material. The cements were placed into dentin cavities with subsequent restoration. The restoration material was acid-etched either superficially or deeply (when the dentin cavity was enlarged with a burs). The specimens were loaded vertically to failure with a universal testing machine and the fracture strength (MPa) and the failure mode were recorded. All cements failed because of cohesive failure within the glass ionomer cements. No significant differences in fracture strength ( $P > 0.05$ ) or mode of failure ( $P > 0.05$ ) were found between the three groups of cements. Friday, August 31, 2009 Looks like I am doing this all alone!! Of course that is because I am... Due to being under the weather with allergies I did not feel like making a welcome basket for a house-warming this week. I know my kind-hearted, generous-spirited house-mother will do a wonderful job of making sure everyone feels welcome. I have missed my girlfriends and their children. Have to be in the hospital again, so maybe I will be able to squeeze them in there for lunch this week. I love my friends, they are so much fun to be with
