Download and run the above crack.

LOCALIZATION.txt: i hope this crack will help you. A: You can replace the lines `dwCmpFileName = (unsigned char *)malloc(strlen(sFilename) + 1);`
`dwCmpFileName = wcstombs(dwCmpFileName, sFilename, strlen(sFilename) + 1);` with
`dwCmpFileName = (unsigned char`

```
*)malloc(strlen(sFilename) + 1 + strlen(fn) + 1);
dwCmpFileName = wcstombs(dwCmpFileName,
    sFilename, strlen(sFilename) + 1);
dwCmpFileName[strlen(dwCmpFileName)] = 0;
dwCmpFileName = wcstombs(dwCmpFileName,
    fn, strlen(fn) + 1);
```

While this works for the scenario you described, it is a bad way to do this. It prevents you from checking whether the file name or the path really ends in `\\`, for example. Instead, you should split the string on all characters which aren't in a valid filename. The result is a list of strings, each ending in `\\` for the full path. Append the filename to this list and build the full path from this list.

```
namespace System.Threading { /// /// Represents an arbitrary value that could be used for task cancellation. /// public enum ManualResetEventSynchronizationScope { /// /// Synchronizes access to the resource, even if there is
```

no current task running on the thread that owns the lock. If the task has completed successfully, the task is cancelled. /// Single, /// 1cb139a0ed
