(NASDAQ:EA) today announced FIFA™ 22, the most authentic and complete FIFA soccer experience ever. Featuring the most intuitive, refined gameplay in the franchise’s history, FIFA 22 will launch worldwide on November 19, 2017, on PlayStation 4, Xbox One, Nintendo Switch™ and PC, giving fans the opportunity to play in more ways and on more platforms than ever before. Ultimate Improvements to Player Intelligence – The most comprehensive and immersive team AI in the history of the franchise was introduced in FIFA 21, and the team has once again been upgraded to support a diverse range of play styles and gameplay philosophies. Building on the refinements made in FIFA 20, players’ intelligence has been expanded to maximize the connection between players and their teammates, with expanded functions to give players the tools to expand playmaking opportunities, including facilitating the most natural passing system in the history of the franchise. The introduction of “HyperMotion Technology,” which uses data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits, now provides unprecedented accuracy in predicting player movement. “When it comes to development, our goal is always to offer more. At the core of FIFA is our desire to enhance what made each previous iteration of the game so great,” said FIFA Creative Director, Matthias Sorrell. “We’ve focused on fan feedback, tuned technical feedback and reviewed player data from more than 6,000 players to build our most immersive game yet.” Focus on Authenticity – Focusing on the technical improvements first, FIFA 22 implements an all-new depth of creation and customization tools built on an advanced system for AI behavior, advanced physics and world environments, and an all-new animation system. From pre-defined camera angles for dribbling, goal kicks, tackles and free kicks, to pinpoint passing accuracy, to height-of-jump control during aerial duels, players can control and shape their game in ways never before possible. Fans will also notice a new presentation layer, including a new set of visuals and animations for free kicks, corners, headers and throw-ins, and all-new player actions during free kicks, shots and headers, including a more natural and fluid spin. For the first time, FIFA
